

AT37 FORD F-150 LIGHTNING

Revolutionize your off-road adventures with the Arctic Trucks AT37 Ford Lightning. Combining the renowned design and performance that put Arctic Truck's on the map with the leading technology of Ford's fully electric truck platform, the AT37 Ford Lightning sets a new standard in electrified exploration.

**CONVERSION STARTING AT:
\$19,900 USD / \$27,750 CAD**

Using minimal lift to accommodate larger tires, our design philosophy ensures excellent on-and off-road performance and comfort. Our ultra-low center of mass design retains near-stock suspension geometry, resulting in confidence inspiring handling on and off-road, improved road manners, and reduced maintenance compared to typical modifications to fit larger tires. Arctic Trucks' signature full-coverage fender flares amplify the profile of the Ford Lightning with authentic Icelandic style and protection.

Each AT37 Lightning is built by an Arctic Trucks Authorized Upfitter, ensuring the highest quality and strong, local customer service. Authenticated with a serialized build plaque and backed by a 2-year/24,000 mile warranty⁽¹⁾, you'll confidently embark on adventures far and wide knowing your vehicle is born from Arctic Trucks' unparalleled expedition experience. Ready to Explore Without Limits?
